AWARD OF MERIT

Yonkers Casino

Yonkers, NY

LIGHTING DESIGN

Tillotson Design Associates

Suzan Tillotson, Ellen Sears, Mitul Parekh, and Kate Nelson

he glowing, organically-shaped, 200-foot-long entry canopy, sits in front of a four-story high, arc of frameless glass. The glass brings daylight into the gaming hall, and allows a dialog between interior and exterior. The steel tube canopy structure is covered by pillows of pressure-inflated ETFE membranes. Linear RGB LED fixtures, stem mounted above the structure, illuminate the translucent fritted top membrane. Small, white LED downlights, integrated into the frame node, light the driveway below. Highlighting the curved glass wall, roof mounted, metal halide floodlights curve over the façade to graze light down the veil-like fritted top edge of the glass.

"The application of light is so transformative. We thought the project was restrained and carefully controlled which yielded beautiful results." - Lumen Awards Jury
